HETTANZ September Editorial– AGM

After the worst dumping of snow in the Southern Region in years the HETTANZ National AGM was held in Dunedin with us being hosted by the Hospitality Team at Otago Polytechnic.

The AGM got off to a tentative start, as the deadline of 11 am presented itself we did not have a quorum so a number of Dunedin members manned the phones and by 11.30 am we had a quorum and the meeting got under way. With the formalities of the AGM out of the way we moved into a programme put together by the National Executive and Southern South Island Regional Representative Scott Richardson.

The programme had an academic focus as well as drawing on the fashion/design aspects of Dunedin interwoven with food prepared by the Bachelor of Culinary Arts students at Otago Polytechnic.

Members went away rejuvenated and enthusiastic about implementing new ideas into their classroom practice. The fashion/design tour took participant to Tamsin Cooper, Moodie Tuesday and Architecture Van Brandenburg. This wide spread of artistic talent went from an Architecture firm designing a multi million dollar fashion house in China using 3D Modeling to a recent arts graduate designing high end fashion garment sourcing material from overseas but keeping the manufacturing in Dunedin to local girl Tamsin Coopers fashion and accessory range. The luncheon served in the Technique Restaurant at Otago Polytechnic included desserts designed around television programmes.

Home Economics and Technology – Best Practice Workshops

Register at:

<http://www.nzqa.govt.nz/about-us/events/best-practice-workshops>

Choose your area and at the bottom of the page there will be a registration link for you to go to.

Why attend a best practice workshop?

Best practice workshops are for teachers to improve understanding of national standards through the use of student exemplars. These workshops will:

Clarify your understanding of grade boundaries of internally assessed standards

Work with supplied assessment materials including samples of student work at all levels

Engage in professional discussion.

It is important that you obtain release time to attend. Generally there are only 2 of these for each subject area. It is apparent that teachers need support and by attending a BPW, not only for the Professional development and professional learning that will take place, but also for networking and sharing of classroom practice with like-minded colleagues.

Don't miss out. Some Best Practice Workshops are cancelled due to insufficient numbers. Three weeks out from the date of a BPW it may be cancelled because of this, so support your subject area and register today.

Presidents Report—

Welcome to the term three newsletter. This term is disappearing very quickly and those teaching senior classes will be now focused on preparation for the writing of external reports in Technology and examinations in Home Economics. **Rachael Dixon and Siobhan Harrod** have a dual presentation at the TESAC conference with a core focus on preparing for the Level 3 external examinations in Home Economics. **Cheryl Pym** is also presenting and she too will spend time on preparing reports for the Technology external achievement standards. Last year was the first year I had students entered in the Level 1 external achievement standard. Feedback and understanding of the intent of the standard were common and key elements for those students who achieved success in this standard.

SAC conference 7 – 9 October meet and greet Sunday 6th October 4.00 p.m.

Registration: Early bird registration has finished but members can still register up until **September 6th** – registrations will not be accepted after this date: www.trcc.org.nz

Accommodation suggestions: www.cqwellington.com

Each regional representative is going to organise a 'early breakfast' get together for members from their regions who are at the conference – they will make contact soon.

Technology hui September 24th.

Cliff Harwood has called for this hui to discuss 'how student learning in technology can be further enhanced'. I will represent HETTANZ but am also going to be representing those members who teach in low decile schools. Many students in these schools do enjoy success in Technology education but there are a number who do not. Why does this happen – this hui allows for discussion focused on these students and technology education.

Welcome to the executive table. At our last executive meeting we had two guests who have since been nominated and following the nomination process are now Regional Representatives. **Elizabeth Ross** represents Central North Island and **Belinda Matthews** Northern North Island. On behalf of all HETTANZ members we welcome Elizabeth and Belinda to executive and know that they will effectively represent the members from their regions. **The role of a regional representative** is largely centred on communicating with members; either seeking feedback or feeding back. Being able to visit regions is encouraged but can be inhibited by distance. Members who take up regional representative roles are engaging in a leadership role which is beneficial for those who are not in a head of learning area position and or for those seeking senior leadership roles. HETTANZ executive are thus concerned that less and less members are seeking nomination for executive. While realising that schools are very busy places and that workload often impinges on family time; we too recognise the professional value gained from time spent as a member of the HETTANZ executive. Members who are considering being a member of the HETTANZ executive are always welcome to attend an executive meeting to garner an 'on the job' understanding of the role and its responsibilities. At the moment there is only one vacancy on executive and that is Regional Representative for Northern South Island. However, should members at any time wish to attend an executive meeting please make contact with Carmel Clark our secretary secretary@hettanz.org.nz. I look forward to meeting those who are attending the conference and wish all members all the best for the remainder of term three,

Adrienne Reeves

Wearable Wonders

By Fifi Colston Review by Sarah Wirth.

Well what can you say like WOW the show this is a polished and creative book. It has lots of amazing ideas with helpful list of all materials to begin each project. Instructions move logically and clearly. Great clear colour choices and I like how this book captures the excitement of making a costume with the reality of budgets and planning emphasised. Fifi Colston has used very broad variety of useful techniques highlighting the use easily available materials and recyclable resources. The layout should appeal to students. It has easy planning suggestions which will make technological planning simple. This is a must for juniors and seniors.

Regional Round Up

Central Region Report—Sarah Wirth

Wellington Branch had a fantastic evening thanking Shirley Wilson for her amazing service to HETTANZ. The night started with drinks at the Roxy Theatre, the movie “dinner rush” and then a fabulous dinner at La Boca Loca. The Manawatu had a meeting on the Thursday 15th August at 4.30pm at Freyberg High School. Bronwen Beaver and Helen Fotheringham did feedback on the AGM and was follow with a delicious dinner at the dumpling house.

As well as the success of students from my region at the Hokonui Fashion and Design Awards held in Gore Southland a special mention has to go to Ruth Bucknell who teaches at Wairarapa College and was the winner of the Open Wool section. Congratulations.

A Lot has been happening in the Central New Zealand region. Look forward to seeing you all at the TE-SAC conference Connect.

Northern Region Report—

I began teaching in 1981, after 3 years training in Auckland. After a few years, I worked at The Microwave Shop as a Home Economist. Motherhood became my next career and I am a parent of two daughters, now 25 and 22. When our youngest daughter started school, I returned to teaching, just in time for the implementation of the new curriculum. Two highlights have been setting up the Technology programme at Beachlands School and changing to a secondary school environment. Alfriston College is the only new, low Decile 3 school in the country and it has been a roller coaster journey over the last ten years challenging the traditional way of educating. I enjoy spending time with my family and friends, reading, baking and crafts. I am passionate about education and exploring ways to achieve positive

Mid Central Region Report—

I am Elizabeth Ross your new Central North Island Representative. I have been teaching since 1995 and have been in the Central North Island since 2004. I was based in Taumarunui and now live in Hamilton. I am Leader of Curriculum Technology at Melville High School. I teach the food related subjects of Home Economics, Food Technology and Hospitality from Year 9 through to Level 3. I am passionate about my subject and my students and aim to provide a well balanced programme for all my students to learn and achieve by providing learning opportunities through food as a career path or as life long skills.

Please submit articles to your executive representative to be included in our newsletter, we love to hear from you.

Southern South Island Report—Scott Richardson

June was taken up with the staging of the HETTANZ AGM in Dunedin and continued to be a busy time. I then attended the New Zealand Chefs Association Conference in Christchurch which was a fabulous event especially the tour of the Waipara Valley vine yards and boutique food produces. This conference clashed with the Hokonui Fashion Awards held in Gore but some great results from the secondary school categories. August was spend in preparation for the New Zealand Culinary Fare in Auckland with many new schools taking part. We also have the local Southland members in the final planning stages for the annual HETTANZ Fashion and Design Awards.

REMINDERS

Ordering of the Kenwood – HETTANZ Kitchen Machines Workbook – to be launched at the TESAC Conference – October 9th

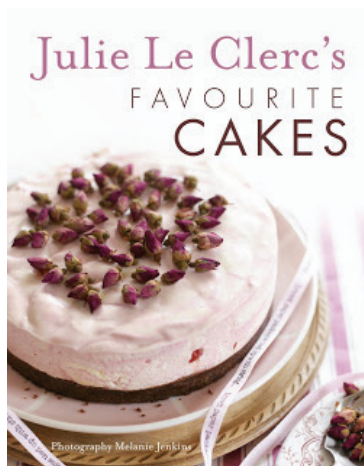

WOW Experience in Wellington – Charity Show on 25th September at 7pm – tickets still available at \$95.

Email you order now before stock goes.

The coveted 2013 Service IQ Secondary Schools Excellence Award trophy is spending another year on the shelves at Manurewa High School. Awarded each year to the school with the greatest number of points in the four secondary school classes of the New Zealand Culinary Fare, the trophy recognises the high level of skill of the competing students as well as the expertise of the dedicated teachers who train them.

ServiceIQ Schools Manager Mark Dronjak personally delivered the re-engraved trophy to the low decile South Auckland school and presented it to the students. The school's Hospitality and Catering Head of Department, Daisy Chandra, said the personal presentation made the students feel very special and made their day.

The New Zealand Culinary Fare is run by the Restaurant Association of New Zealand, with Service IQ sponsoring two of the categories, the Secondary Schools Excellence Award and the Modern Apprentice Chef of the Year. Competition for both is intense, and many of those who have won have gone on to exceptional cooking and hospitality careers.

Manurewa High School took part in the Secondary Schools Culinary and Front of House competitions. Scoring impressive results in all four categories, the team members are all deserving winners of the Service IQ Secondary Schools Excellence Award and are living proof of the school's motto "Piki Atu Ki Te Rangī – Aim High, Strive for Excellence".

Conference 2013 CONNECT putting the pieces Together—Workshops for intermediate and junior high school teachers

Session title Presenter

Monday 7th October

1.30 p.m. – 3.00 p.m. repeated after the afternoon break

E textiles hand on - all levels (repeated Tuesday)

Bridget McKendry - Christchurch

Intermediate workshop (details to be confirmed) Kim Henry – Intermediate teacher

Good food choices & the internet – all levels Glenda Gourley

1.30 – 5.00 p.m.

Resources to encourage thinking outside the box

(textiles focus but sharing teaching pedagogy applicable to all disciplines)

Participants will travel to Hutt Intermediate
